

Get Active!

Why not organise a sponsored fun run at work or school? This could even be done in fancy dress! Sponsored walks and hikes for all abilities are a great way to get lots of people involved...alternatively, why not set yourself a personal goal and get sponsored to reach it?

Get creative!

If getting physical isn't your thing, why not organise an arts and craft evening with your friends who can pay a fee to join in? You could even sell your handicrafts at a table top sale at school or work!

Offer your help!

Time is short for many people and they might be happy for a break! Why not offer to walk your neighbour's dog, wash their car or do some ironing in exchange for a donation to Environclean Community Group?

Get organised!

Most people have clutter in their house they would like to get rid of – but remember, one man's clutter is another man's treasure! A car boot sale, swap shop or table top sale may be a great way to have a good clear out and raise money for an incredible cause

Use your skills!

Everybody has something that they are good at – why not use your skills to raise money for Environclean? If you like singing, why not put on a show? If you like to act, organise a play or dramatic reading? If you bake really good cakes, why not organise a cake sale?

Get the party started!

Everyone needs to let their hair down now and then – a club night, live music event, ball or disco can be a great way to have fun, raise awareness and raise funds. Many musicians will happily pay free of charge for charity and many venues will also give reduced or free hire.

Remember – this list of ideas is not exhaustive – use your imagination or look on the following websites to come up with your favourite fundraising idea – then GO FOR IT! Every penny raised will be hugely appreciated and there's a good chance you'll have a great time!
